B.SC 4th Semester Computer Science (Hons.) HTML Assignments for Group-A

- 1. Create employee registration web page using HTML form objects with proper Client Side Validation.
- 2. Design a website for a College. There should be at least 5 webpages present in the website. There should be:
 - One Home page that leads to other pages. The Home page should contain the name of the college as heading along with the college logo. There should be a tab with the following links:
 - Home;
 - Academics;
 - Admission;
 - Gallery.
 - There should be an appropriate description of the college on the home page.
 - One Academics page which contains a list of all the departments present in the college like
 Arts, Science and Commerce. The list should be a nested list, with available courses mentioned
 under each department. There should be a minimum of two courses under each department,
 (for e.g. Computer Science and Mathematics under Science, English and Sociology under Arts
 and so on). Each Course entry in the list should be a HTML link that leads to a web-page
 totally dedicated to the course itself.
 - Each Course should have its own dedicated webpage. This page should contain a description about the course, a list of all the teachers taking the course and the timetable for that particular subject.
 - The Admission page basically contains a form that a student needs to fill up in order to take admission in the college. The form should ask all the necessary questions using appropriate form elements.
 - One gallery page that contains set of photos taken of the college and its students.

Please note that each webpage in this website should have the same background Image/color. The looks of each page should be similar.

- 3. Design a website for the Tourism Sites of a given City. There should be at least 5 webpages present in the website. There should be:
 - One Home page that leads to other pages. The Home page should contain the name of the City as heading along with a logo. There should be a tab with the following links:
 - Home:
 - Heritage;

- Hotel Booking;
- Gallery.

There should be an appropriate description of the college on the home page.

- One Heritage page which contains a list of all the Heritage Sites present in the city. The list should be a list of Pictures. There should be a minimum of ten heritage sites. Each Image entry in the list should be a HTML link/button that leads to a web-page totally dedicated to the Heritage Site itself.
- Each Heritage Site should have its own dedicated web-page. This page should contain a description about the site along with its history.
- The Hotel booking page basically contains a form that a person needs to fill up in order to stay in a hotel. The form should ask all the necessary questions using appropriate form elements.
- One gallery page that contains set of photos taken of the Heritage Sites throughout the city.

Please note that each web-page in this website should have the same background Image/color. The looks of each page should be similar.
