## **A note on the webinar**

The first step to solving a career option problem is to bridge the gap between where one wants to be and where one is then placed vis-à-vis that desire. Career Counselling & Training Programme (CCTP), a unit of Asutosh College, is dedicated to help bridge this gap by providing guidance and training through a 6-month compulsory course for final year undergraduate students of the College and enable them choose the right career.

Amidst the plethora of career opportunities available today, it often becomes difficult for students to realize and understand what is important to them, what they enjoy doing and what their skills are actually. Keeping that in mind seminars/webinars are organised every session to give a broader perspective regarding career paths by inviting experts in different fields to share their knowledge.

Join us for the 2nd webinar of the session titled '**Diverse Careers: Entry & Sustainability**' to explore the varied career opportunities in the Corporate World, Administration, Research, Media, Performing Arts, and Self-employment. Six specialists from these selected fields will speak about the methods of entry in each and ways to remain motivated in the changed scenario of the professional world as a result of the COVID-19 pandemic. Their personal experiences and knowledge will help students discover their interests and choose the most suitable career option. The lectures will also familiarise them with the impediments in their chosen profession and ways to overcome the same.
