1. Why Dengue awareness program	3
2. Campus awareness program begins from Main building	4
3. Work done, discussion with locals	5
4. Closure	6

1. Dengue is a viral disease transmitted to human by the bite of infected Aedes mosquito. Mosquito breeds in areas having even a small quantity of water, generally stagnant water. If bitten by infected mosquito, symptoms like fever, fatigue, vomiting sensation, Joint pain, and muscle pain. Even death is possible.

Like previous years, Asutosh College has taken the initiatives of organizing the Awareness program in all the college campuses, near college surrounding areas etc. On 26th September, 2023 NSS unit comprising of NSS coordinator, other members including faculties and students of the college has visited Patuapara slum area, Bhawanipore, Kolkata for spreading Dengue awareness program by talking to the residents, spreading bleaching powder in the garbage area, places with stagnant water etc.

2. Procession from Main building to Patuapara is conducted by NSS volunteers and teachers as part of the awareness program on 26th September, 2023. Our members have done their job by spreading bleaching powder, cleaning, discussion etc.

3. Our NSS coordinator Dr.Parthasarathi Bera has talked with the residents there to advise, suggest them to not allow water to remain stagnant near their house, to clean the blocked drains, tray below the fridge also to be cleaned regularly, also to dispose of old containers, mug, buckets, tyres etc, to keep the water tanks and water containers covered so that the mosquitoes cannot enter there and start breeding. Also the importance of cleaning the surroundings of a house is discussed. We also asked whether they use mosquito nets or not as part of the program.

4. The program is completed by sprinkling bleaching powder in the college premises followed by a short lecture given by the NSS coordinator Dr. Parthasarathi Bera

Students/Volunteers Participated in the program

1. Mohammed Ibrahim Reza Khan
2. Soumyadip ghosh
