

## Report About Asutosh College (Main Campus)

Corridor beautification can improve the quality of life and teaching atmosphere inside the College Campus. Following this theory, the indoor plantation programme of Asutosh College brings a lot of changes in the quality of teaching inside and outside the classroom. Indoor and outdoor plants of this college also provide opportunities for getting themselves aware of environmental education, and getting young students thinking about environmental conservation.

ACTC Building, Humanities Block and Main Building of Asutosh College are decorated with large number of indoor plants. Teaching faculty, non-teaching staff, and students always take care and protect them. Thus our college provides countless opportunities for discovery, creativity, problem-solving, and also STEM education by constantly beautifying the campus.
