

Seminar Lectures

Lecture-2

Speaker: Dr. Keya Ghosh

Associate Professor

Department of Chemistry

Asutosh College

Date: 27th March, 2023

Topic: Organic Chemistry and Human Life

Abstract:

An organic chemist explores the chemistry of the organs of a living body.

Organic chemistry is related with our existence. It is the chemistry of Protein, carbohydrate, fat, all kinds of medicine, Agriculture, food flavour, food colour, all kinds of perfume, cream, soap, shampoo, all cosmetics. Human life is the chemistry of carbon compounds. So, purpose of learning chemistry must be defined properly. A student of chemistry in graduation or any higher education has huge responsibility to explore or to apply his knowledge to enrich human life in various aspects
