

- TITLE OF EVENT/ PROGRAMME: **Every day is a Seminar Day (Phase 1)**
- THEME OF THE EVENT/ PROGRAMME: Understanding Speech Disorders through Clinical Phonetics
- DATE: **23.09.2022**
- VENUE: Seminar Hall, Centenary Building, Asutosh College
- COLLABORATOR/S (IF ANY): IQAC
- OBJECTIVE/ PURPOSE: To provide insights into the concept, types and stages of Speech Disorders and understanding it within the purview of Clinical Phonetics.
- SPEAKER/S / RESOURCE PERSON/S: **Dr. Moumita Singha**
- TARGET AUDIENCE/ PARTICIPANTS: Students of Semester 1/3/5
- BRIEF REPORT ABOUT THE EVENT/ PROGRAMME: Dr. Moumita Singha delivered a lecture on “Understanding Speech Disorders through Clinical Phonetics” 23.9.2022 at the Seminar Hall of Centenary Building, Asutosh College. The lecture began with an overview of the basic principles of speech production, including the anatomy and physiology of the vocal tract and the process of articulation. Dr. Singha then discussed different types of speech sounds, the International Phonetic Alphabet (IPA) and Extensions to the International Phonetic Alphabet (extIPA) in order to transcribe them. Throughout the lecture, she provided examples of case studies and encouraged audience participation through interactive activities and opportunities for questions and discussion. She also highlighted the importance of interdisciplinary collaboration in the field of Clinical Phonetics, such as working with teachers, psychologists, and other healthcare professionals to provide comprehensive care for patients with speech disorders. Overall, the lecture on Clinical Phonetics was well-received by the students as it was informative, engaging and thought provoking, providing a thorough introduction to the field and its applications in speech assessment and therapy.
- EXPECTED OUTCOME: Acquiring insights into the concept of Clinical Phonetics as a distinguished branch of Phonetics, and its effect on analysing and assessing speech disorders, especially in children and gaining a broader

comprehension on the subject and an awareness on several treatment approaches used in Clinical Phonetics.
