

Report on Extension Activity

In today's world, learning is no longer simply a classroom experience. Tremendous changes in the world around us have been mirrored by changes in the syllabus. Our students are required to step outside the confines of classroom, and this was done by our fifth semester students on 28th March, 2024. After a visit to the Alipore Jail Museum, they went to Chittaranjan National Cancer Institute, opposite our college. They interacted with and handed out food packets to those of the poorer sections of society who live habitually on or near the footpaths. This was an entirely new experience for them. It may have made them ponder how privileged their position is in society.
