The blue-blood can save your life, if you don't wipe it out first.

Or one of nature's great survivors. They outlived dinosaurs, survived four previous mass extinctions, but now menaced by pharmaceutical industry, fishing communities, habitat loss and climate change. Shame on humanity!!!

CONSERVATION & AWARENESS of the LIVING FOSSIL HORSESHOE CRAB

DO YOU KNOW ?

- The copper based blood is most sensitive indicator of bacteria ever discovered.
- You has had an infection, vaccination or surgery? Then definitely you too have been benefitted from them.
- It can be the answer to a SAFE CORONAVIRUS VACCINE.

CONSERVE THEM

- Don't trap them in fish nets.
- Dispose the by-caughts.
- Ban using them as bait.
- Strict action against those selling them illegally.
- Local fishermen should be aware of their importance.

**PAY HEED TO THESE LESS CHARMISMATIC SPECIES,
BETTER YOU SAVE A HUMAN LIFE,
THEN TAKING A HORSESHOE CRAB'S LIFE.**

SAVE THE BEES SAVE THE WORLD

BUMBLE BEE

Kingdom: Animalia
Phylum: Arthropoda
Class: Insecta
Order: Hymenoptera
Family: Apidae
Tribe: Bombini
Genus: Bombus

Bumble bees are important pollinators of wild flowering plants and agricultural crops. They perform a behavior called "buzz pollination", in which the bee grabs the flower in her jaw and vibrates her wings muscles to dislodge pollen from the flower.

Loss of bumble bees can have huge negative ecological consequences. They need to have considerable conservation attention, urgently. Due to loss of habitat, diseases, pesticides, and climate change, the bumble bees have been classified as ENDANGERED under the Endangered Species Act.

Pritha Das, B.Sc., 3rd Year

SAVE EARTH, SAVE LIFE!!

Unhealthy Environment

Healthy Environment

WAY TO BE HEALTHY ENVIRONMENT

- ✓ Plant more trees; Stop cutting trees
- ✓ Turn off the electronics when not in use
- ✓ Use public transport more
- ✓ Don't litter
- ✓ Use clothes bags while shopping
- ✓ Conserve water
- ✓ Choose locally grown or organic food

- ✓ Reduce, Reuse, Recycle
- ✓ Choose sustainable
- ✓ Use eco-friendly products
- ✓ Start a compost pile
- ✓ Freeze leftovers food
- ✓ Use a compact fluorescent bulb
- ✓ Learn and share
