

ASUTOSH COLLEGE
DEPARTMENT OF BOTANY
BOTANY HONOURS
B.Sc. SEMESTER V : (CBCS UNDER CU)
DISCIPLINE SPECIFIC ELECTIVE
DSE – A (BOT-A-DSE-A-5-1-P)

FULL MARKS 30

TIME: 1 hr 30mins

ANSWER THE FOLLOWING QUESTIONS (ANY THREE)

1. Random sample from a seedling population of *Brassica* seedling, the following frequency table is made. Find out the mean, median, standard deviation and standard error from the data given. 3+2+3+2=10

Seedling length	20-22mm	23-25mm	26-28mm	29-31mm	32-34mm	35-37mm	38-40mm
No. of seedlings	2	5	7	13	8	4	1

2. In a breeding experiment of a crop plant the F₂ generation showed the following data :

850 green seeds and 200 yellow seeds.

Find out the Goodness of fit through Chi-square analysis and comment on the inheritance pattern of the colour character of seed. 3+4+3=10

3. Give examples of one positively and one negatively correlated variables, show their graphical representation.

Calculate the Correlation Co-efficient between X and Y from the following data:

X (No. of leaves)	5	9	13	17	21
Y (length of stem)	12cm	20cm	25cm	33cm	35cm

2+2+6=10

4. Write the steps for variance calculation. Which statistical test do you use to test that the two different samples are from the same population or different population?

The SD calculated from two random samples of sizes 9 and 13 are 2.1 and 1.8 respectively. Whether the sample data obtained from same population?

The F-value at 5% probability level with df 8 & 12 is 2.85.

4+1+5=10

*Chi-square Table is given in the next page

Chi-square Distribution Table

d.f.	.995	.99	.975	.95	.9	.1	.05	.025	.01
